PROFESSIONAL SUMMARY

Junior Penetration Tester focused on web application security, reconnaissance, and vulnerability assessment. Hands-on experience gained through cybersecurity training, practical labs, and security testing exercises. Familiar with identifying and testing common web vulnerabilities, including SQL Injection, Cross-Site Scripting (XSS), CSRF, IDOR, File Upload, Path Traversal, SSRF, and JWT issues, using tools such as Burp Suite, Nmap, Metasploit, and Kali Linux. Continuously developing practical skills in offensive security and vulnerability analysis.

TECHNICAL SKILLS

Penetration Testing & Security: Web Application Penetration Testing, Vulnerability Assessment, Reconnaissance, Enumeration, OWASP Top 10

Web Application Security: SQL Injection (SQLi), Cross-Site Scripting (XSS), Cross-Site Request Forgery (CSRF), Insecure Direct Object References (IDOR), File Upload Vulnerabilities, Path Traversal, Server-Side Request Forgery (SSRF), JWT Security

Networking & Systems: TCP/IP, HTTP/HTTPS, DNS, Linux, Basic Networking Concepts

Security Tools: Burp Suite, Nmap, Metasploit Framework, Wireshark, Kali Linux

Programming & Scripting: Python, PHP, JavaScript, SQL, .NET / ASP.NET

CYBERSECURITY TRAINING & EXPERIENCE

Vulnerability Analyst and Penetration Tester Trainee - Digital Egypt Pioneers Initiative (DEPI)

07/2026 - Present

- Developing practical skills in vulnerability assessment, reconnaissance, enumeration, scanning, and web application security testing.
- Conducting hands-on security exercises using Burp Suite, Nmap, Metasploit Framework, and Kali Linux.
- Applying penetration testing methodologies to identify and analyze common web application vulnerabilities through practical labs.
- Documenting findings and developing an understanding of vulnerability analysis, testing techniques, and security best practices.

TryHackMe - Hands-on Penetration Testing Labs

- Completed hands-on security labs including Blue, OhSINT, and Neighbour, practicing reconnaissance, enumeration, vulnerability identification, and exploitation in controlled environments.
- Applied a structured penetration testing workflow covering information gathering, scanning, enumeration, vulnerability analysis, and exploitation.
- Worked with Linux-based security tools and techniques to investigate vulnerable services, identify attack paths, and validate security weaknesses.
- Practiced identifying and testing common web application vulnerabilities, including SQLi, XSS, CSRF, and IDOR, through controlled labs and training exercises.

PROJECTS

Web Application Penetration Testing Lab - OWASP Juice Shop

Burp Suite, Nmap, Kali Linux | 09/2026 - Present

- Conducted a structured web application security assessment on OWASP Juice Shop within a controlled Kali Linux lab environment.
- Utilized Nmap for reconnaissance and Burp Suite Pro/Community for advanced traffic interception, fuzzing, and manual analysis.

- Identified, exploited, and validated critical web vulnerabilities, including SQL Injection (SQLi), Cross-Site Scripting (XSS), IDOR, and CSRF.
- Authored a comprehensive, industry-standard penetration testing report detailing reproduction steps, risk impact, and actionable remediation guidance.
- Published documentation and supporting proof-of-concept (PoC) evidence on GitHub.

H-Cafe - Full-Stack Cafe Management Web Application

Technologies: .NET / ASP.NET, ASP.NET Identity

- Developed a complete cafe management web application using .NET / ASP.NET.
- Implemented user authentication and authorization using ASP.NET Identity, including session management.
- Implemented role-based access control for different user roles, including Admin, Supervisor, and Employee.
- Developed functionality for managing users and application data based on assigned roles and permissions.
- Built administrative and management features as part of a complete web-based management system.

CERTIFICATES

- Cybersecurity for Beginners - ITI Platform Mahara-Tech (Content Partner: VMware)
- Red Hat System Administration I - ITI Platform Mahara-Tech, June 2026

EDUCATION

Assiut University - Bachelor of Computer Science

2023 - 2027 (Expected)

- Major: Information Technology (IT)
- GPA: 3/4.0

LANGUAGES

- Arabic - Native
- English - B1
